

Lexan* Corrugated Sheet - Omega Shaped Profile

New extra wide corrugated polycarbonate sheet with Drippard® condensation control for greenhouse coverings

Lexan corrugated sheet is made in high performance polycarbonate with excellent light transmission and high impact resistance especially for greenhouse applications. The Drippard condensation control prevents water droplet formation, and so protects crops from plant diseases and spoilage. Available in extra wide sheets of 1870 mm, Lexan corrugated sheet is quick and easy to install and costs less because fewer overlaps and fasteners are required.

Lexan corrugated sheet – Omega shaped profile offers

- High impact resistance
- Maximum condensation control
- Extra wide sheet of 1870 mm
- Excellent light transmission
- UV protection
- Quick and easy installation
- Standard colors - clear, clear textured, opal white, opaque white
- More colors on request

Dripgard® condensation control

Dripgard treatment is a special hydrophilic condensation control developed by SABIC Innovative Plastics, Specialty Film & Sheet that reduces the surface tension of Lexan®* corrugated sheet. This decreases the contact angle between water and polycarbonate sheet and consequently prevents water droplet formation. The condensate is distributed as a thin film over the sheet surface, preventing loss of light transmission and water droplet formation causing plant diseases and spoilage.
